United Bible Societies: Capacity Building

Overview

This project provides a specialist consultant for capacity building support to Bible Societies globally, but specifically for special focus on Papua New Guinea (PNG), South Pacific and Syria.

The Need

Many Bible Societies around the world are passionate about meeting the need for Bible work in their countries, but don't have the resources or capacity they need.

This project addresses that need by providing consultancy and capacity

building support to Bible Societies globally, in key functional areas.

These areas include Strategy building, Fundraising, Property development, Human Resources, IT, Staff training and more.

Project Goals

The overall goal of this project is to build capacity in Bible Societies around the world, leading to increased resilience, efficiency and effectiveness for sustainable Bible work in the respective countries.

Specifically, this project seeks to:

1. Create capacity building plans and provide training and support for Bible Society PNG, Bible Society South Pacific and Bible Society Syria.
2. Start implementation of the above plans according to the timelines.

Impact

The impact of this project will be seen as the capacity and local income generation of these Bible Societies improve, resulting in more effective and

sustainable Bible Societies, better able to serve the Scripture needs of their audiences.

Prayer Needs

- Please pray as BSA seeks to provide capacity building support for other Bible Societies, specifically PNG, South Pacific and Syria.
- Pray that the key functional areas of these Bible Societies – including Fundraising, Property Development, HR, IT, etc. – would grow and flourish with the help BSA provides.
- Pray that these efforts would lead to increased resilience, efficiency and effectiveness for the Bible work in these countries.
